Says:

To not a few of the ablest and most earnest advocates of reform it is appearing doubtful whether the measure to be finally matured by Congress will be found really worth presenting to the country. It is every day becoming a more serious question whether the interests of reform may not be best served by permitting the whole question to stand over for the maturer and more dispassionate consideration at a later stage. To our view, neither the country nor the majority party would be likely to suffer more from such a tentative course than by the adoption of a bad measure.

To go forward with the present bill, stained with disgrace and tainted with stock jobbing, will only prove that the Bourbon element in the Senate is deaf to every rotest, blind to every warning, and sholly controlled by the dictates of hatred and greed. The Journal of Commerce has simply placed itself in line with the honorable sentiment of its own party and the desires of the vast majority of New York business men when it calls for a halt in the work of crushing the leading industries and paralyzing the business of the North.
